

Making the world a greener place

We're devoting our energy to saving it

Climate change is one of the biggest challenges for mankind and the natural world. We take the green challenge seriously. We believe that everything we do describes who we are. We do our best to ensure that the impact we make is positive in every conceivable way.

As a company, we are committed to making the world a better place for future generations and to optimising the business environment for all our customers today. We are dedicated to improving products and processes continuously in line with the needs of our customers and our planet.

Reduce your carbon footprint

There's huge potential for a refreshed fountain offering, especially one with a minimal carbon footprint, and we've developed it. 'Energize' is a complete soft drink dispense solution that produces **proven energy savings of up to 40%***! That means remarkably lower energy costs plus lower carbon footprint for your business, as well as longer part life expectancy on parts.

And there's more

With Energize's integrated performance diagnostics, your retailers benefit from far less downtime with service call-out costs significantly reduced, saving them large sums of money.

Less obvious, but most important, is the delivery of a drink that delivers consistent **carbonation and temperature** ensuring that the quality is superb.

No wonder customers come back for more time and time again And there are many other benefits of installing Energize: useful sales data, seeing your company or brand's green credentials grow and your Corporate Social Responsibility reputation in the business community becoming greatly enhanced. Why wait?

Get Energized!

Engineering excellence

The engineering behind Energize is at the forefront of development and refinement. We ensure consistent build quality, standardise the parts we use and simplify the way our machines are built, installed and serviced.

The result?

- Exceptional performance
- Outstanding reliability
- Superb sustainability

Our hallmarks.

Thinking smarter – saving more

Knowing where and how to transform an existing system into one that is supremely energy-efficient is key to meeting today's tough eco-requirements – and we're particularly good at it.

With Energize we made amazing savings up to 40% – by improving insulation and the fridge deck, by varying the speed of agitation and re-circulation and by simplifying the way the python/syrup is cooled. One look at this comparison proves how energy-efficient the system has proved to be:

Energy consumption comparison:

A new level of IQ - pure genius

Imagine a future where downtime is greatly reduced. Where any signs of ill health in your system are recognised and signalled and where the service controller knows something is amiss before the account do. Where service engineers automatically know when it's time for them to pay you a call.

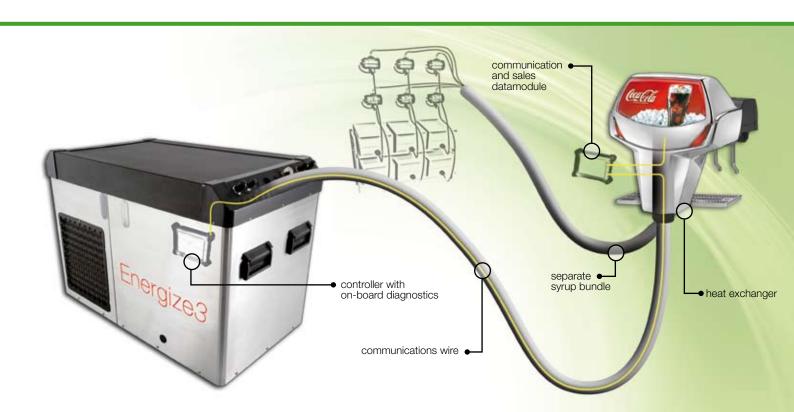

Where they come armed with the right spare parts, every time.

That's the genius of Energize.

Combining innovative communication technology with remote and on-board diagnostics, once Energize is installed it not only keeps an eye on what's happening in the present - it enables you to build up a machine history so you can actively manage your assets. Its intelligent diagnostics ramatically simplify your service requirements, while advanced communication modules enable web-based monitoring, delivering diagnostic and sales throughput data when and where you need it.

Energize works smarter and simpler, keeping lifetime costs to the bare minimum. Your system will work efficiently and effectively – guaranteed. And you'll be pleasantly hassle and worry-free.

An intelligent choice, don't you think?

Get Energized

- Sustainability
- Accountability
- Profitability
- Proven energy savings of up to 40%!*

You can't beat these benefits

Translated across your customer base, they add up to an outstanding, cost-effective investment.

Install Energize and you will:

Power up your profits

- Step up your energy savings
- Invigorate your green credentials
- Cut your carbon footprint
- Prime your brand's goodwill

Push down your costs

- Pump up drinks quality
- Actuate lower through-life costs
- Activate minimal downtime

Optimise through-life value

- Fire up useful sales data
- Actively manage your assets, ensuring they are delivering profitability

Recharge the bottom line

- Increase profitability
- Utilising sleep mode further energy savings possible
- * @ 32oc ambient Coca Cola 'C' Condition Installation
- * up to 60% saving using 'sleep mode

IMI Cornelius Europe www.imi-cornelius.net

Cornelius – stepping up to protect our planet

Cornelius provides brand-owners pathways to sustainability by helping you reduce your operational carbon footprints. We help streamline your work processes and minimise your use of energy. Our aim is to find the best ways of balancing bottom line accountability with environmental compliance. We do that by optimising the lifecycle cost of cooling, carbonating and dispensing equipment – something at which we excel.

And why we excel is simple: we work smarter. We take what works, add a healthy measure of innovation and transform what was already very good into what, unquestionably, is the very best.

Energize is an outstanding example of smart thinking. It's a system with profound benefits for the planet as well as one capable of delivering excellent savings and profit for you.
