NRI

Mobile audit readout unit

The NRI USB Audit Stick provides mobile, user-friendly and secure alternative for the collection of audit data from NRI coin changers.

Secure data retrieval:

- Easy and secure data transfer via printer cable with the standard version or additionally via IrDA with the battery version
- Status control via coloured LEDs based on the traffic light system
- Data transfer to the PC via standard USB
- Robust and shock-proof housing

Data provision:

- Download, display and print out data by use of free of charge software Audit Manager
- Further processing of data with Microsoft® Excel and Access possible
- Extent of desired audit data fields fully selectable through Audit Manager

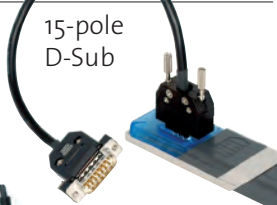

Further equipment and connecting options:

Which USB Audit Stick?	For which protocol/function?	Using which NRI adapter cable?	On which connector?
------------------------	------------------------------	--------------------------------	---------------------
